- 1. A hair treatment composition comprising a silicone pressure sensitive adhesive emulsion in which the emulsion comprises a disperse organic solvent phase in a continuous water phase.
- A hair treatment composition according to claim 1, in which the silicone pressure sensitive emulsion prior to addition to the composition comprises a disperse organic solvent phase in a continuous water phase.
 - 3. A hair treatment composition according to claim 1 or claim 2 in which the emulsion further comprises a surfactant.
 - 4. A hair treatment composition according to any preceding claim in which the organic solvent is a hydrocarbon.
- 20 5. A hair treatment composition according to claim 4 in which the solvent is isododecane.
 - 6. A hair treatment composition according to any preceding claim which is a leave on product.
 - 7. A hair treatment composition according to any preceding claim which further comprises a propellant.
- 8. A hair treatment composition according to any preceding claim in which the propellant is a hydrocarbon gas.

WO 2004/084847 PCT/EP2004/002399

- 40 -

- 9. A hair treatment composition according to any preceding claim further comprising a hair conditioning agent.
- 10. A composition according to any preceding claim, in which
 the silicone pressure sensitive adhesive comprises 20 to
 80 % by weight of the silicone pressure sensitive
 adhesive emulsion.
- 11. A method for styling hair which comprises contacting the 10 hair with a composition in accordance with any preceding claim.
- 12. A hair treatment composition obtainable by adding a silicone pressure sensitive adhesive emulsion comprising a silicone pressure sensitive adhesive and an organic solvent phase in a continuous water phase to a base composition.
- 13. The use of the hair treatment composition according to any one of claims 1 to 9 to impart hair styling without stickiness.
